This document clarifies the fee charged to approved centres on the basis of their territory in order to make qualifications affordable to centres. This document ensures that all centres based at various locations have equal opportunities to grow their businesses. Territory-wise fee bifurcation is where the learner registration fee is charged based on the territory, considering the territory-wise income of countries, and offers several advantages to educational institutions. This approach makes qualifications and other services offered by IIMT Studies affordable to centres.

The fee charged is for two segments.

The National fee: The fee charged to centres in the UK

The Cross-border fee: The fee charged to centres located in countries other than the UK. This fee is divided into three sub-segments.

- High-income territory
- Middle-income territory
- Low-income territory

Fee classification for Centre Recognition, Quality Assurance and Administration:

The National Fee: The national fee is applicable to centres in England, Scotland, Wales and Northern Ireland.
